EXPERIENCE

Advance Associate

Nousot

Nov 2021 – present

- Designed and automated a customer segmentation model to improve targeted marketing campaigns for the 9M customers of a leading jewelry brand.
- Defined and analyzed promotional success metrics from customer data to influence promotional planning for 2022 and beyond at a leading jewelry brand.
- Built, tuned, and maintained machine-learning product recommendation models across AWS and Azure to improve product conversions for multiple credit unions.
- Spearheaded internal Power BI reporting initiatives to optimize executive plans for the future allocation and current utilization of all employees.

Process Engineer

Mondelēz International

Jul 2021 – Nov 2021

- Planned and managed an overhaul of the bakery's canola oil delivery system to reduce maintenance costs while improving product quality.
- Recommended organizational process improvements to grow throughput figures and reduce the waste of the Belvita line.
- Identified and mitigated technical risks for high temperature oil tank cleaning by collaborating with quality and safety leads.
- Sustained product output during union labor strike by operating plant machinery on 12-hour shifts.

Procurement Operations Intern

Mondelēz International

Jun 2020 – Jul 2020

- Compiled, analyzed, and reported end-of-month data regarding supplier OTIF delivery performance for all NA plants utilizing Excel pivot tables.
- Discussed OTIF delivery performance results and trends with suppliers and plants in order to improve future results.
- Collaborated with spending leads to increase payment terms for 480 suppliers totaling \$19,000,000 in spend.
